

ISO ClaimSearch

ISO ClaimSearch Compliance Dashboard Access Request

Provide User ID's for associates that require access to ISO ClaimSearch Dashboards NOT managed through ISO ClaimSearch Self- Admin. Please note these dashboards are only available to those participating organizations which have actively authorized ISO ClaimSearch to match on your behalf. By requesting users access you are not authorizing for matching, this requires a completed authorization form.

Group Level: Access grants visibility into all affiliates and subgroups under your current company as provided to ISO ClaimSearch.

Company Level Access: This will grant a user access to see only the company they are assigned to including associated office codes as provided to ISO ClaimSearch. Users will be unable to see matches for affiliate companies.
